So yeah, it's been a quick four years! At least now it seems like it back then it felt so slow! I don't really know what to say. Could thank my parents: thanks Mom and Dad for helping me! Oh and Christine too! Sure, I'll thank Nick too. Maybe my teachers: Mr. Kot, Houston, Beer, Debacher. I don't know who's Ms. and who's Mrs.: Kelly, Flint, Eastman, Donovan, Biron, Senorita Jones and whoever else I forgot that I've had over the years. In these four years of high school, I've had so many memories. Man, all that school work I did; all that school work I didn't do. Now all I need to do is figure out what I want to do now. So yeah, hope everyone has a great life after HHS! (Nice, just hit 1000 characters)

These four years have been long and hard. I want to say thanks to my friends! CM, CW, EF, CD, MF, JD, CH, DM etc.....I also want to thank my mom, dad, step mom, and my grandma for helping me throughout school and helping me to find a career and college that I like. Thanks for being there for me, and I hope to see you later in life.

Nathaniel Burnie

The first thing that came to mind when I thought about writing this was how I wanted to include all of those people who were close to me this year. Then I realized that wouldnt be fair. Ive known so many of you guys and my friendships have changed from year to year. If I had written this freshman year, it wouldve been completely different from what it is now. I dont think I would have room to even start mentioning all the great moments weve gone through, so just know that you are all in my mind and hopefully Im in yours. I know I wont forget these four years, and I hope you dont need a quote in a yearbook to remember me by either.

I cant believe this is all coming to an end. The memories I have made here in Harwich are so much more then I have ever expected from this small town. I would like to thank my parents for always being there and encouraging me to succeed, I love you both. Mimi and Justus, good luck and stay strong, good times - bathtub submarines, breaking windshields, and silly- sister shows. Class of 2007, I owe you a lot. Growing up with all of you has taught me many lessons that I will take with me into this world. I know I have always been the quiet one, who doesnt talk to many people, but that doesnt make the impact you have had on my life any less. All of you have helped me become the person I am today, and for that I will always be grateful.

Jaclyn DiNoia

After four years of chorus making me meet new people, of standing in our spot every morning, after four years at Harwich High, I am me ^-^. Because of that I owe my thanks to my parents and teachers (especially Ms. Richard, Mrs. Chilaka, Mr. Kot and all my History teachers) your such an important factor in my life. Though my greatest thanks and love go to my friends, whom without I dont know who Id be. So thanks everyone, you have been such a big part of my life, and I will definitely miss meeting in our spot in the lobby every morning, and of always eating lunch together (Ill even miss the constant drone about videogames :p). Finally to my best/favorite friends: Bry, I may tease you but you are my favorite blonde brunette and I love ya- & Emily, so many thoughts and not enough words, you are my best friend and my other half and I love ya^-^

- Goodbye Harwich, all that I will miss will be my teachers, friends, and the Arts wing :)

Who can guess that twelve years have finally come up. Cant say that I was quite prepared for it to come by so fast. Anyway, I would like to thank my mother and father for their support and care they have given me. I would also like to thank the teachers Ive had for their guidance, discipline, and considerable amounts of knowledge. And most of all, I want to thank all you guys for the past years weve spent together, for all the times youve put up with my weird behavior and all of you whove saved my ass on whatever it was I asked of your assistance. I only hope that Ive left as good an impression of myself to all of you as all of you have given to me. May we all meet each other in the near future to hopefully happier times for us all.

I dont even know how to begin. High school has been the largest journey in my life and I know that I will never forget HHS; the good and the bad (and the ugly). NB- my partner in crime, you have been a huge part of me. Thank you for all that you have done. Girls- you know who you are. Thank you for all of the laughter. You never cease to amuse me. I find myself at a loss for words, and those who know me, that is a very rare occasion. I guess this is it now, it definitely paid off. Its all over. Were getting a push off the ledge...lets hope that we grew some wings along the way!

Alexander Jenkins

To my teacher Mrs. Cote for keeping me organized the best I could even though I always got angry about it. To my teacher Mrs. Coppola for trying to keep me on task with work and trying to help me pass my classes. To my guidance consoler Mrs. Calagy for helping me meet with Deb Stier and to meet with ITT tech to try and see what I will need to get into their school. Best of luck to others and I hope everyone graduates.

Wow I can't believe it is all coming to an end. My Harwich High experience has been an interesting one. My friends, for all the fun we have had, and will continue to have. Frank, Shane, Liana, Ben, LAN nights must live on! John Ryan, if it weren't for your class I don't know what I would have done. Thank you to everyone else who has touched my life in some way, no matter how small. Good luck to everyone, and remember: "Be like water making its way through cracks. Do not be assertive, but adjust to the object, and you shall find a way round or through it. If nothing within you stays rigid, outward things will disclose themselves. Empty your mind, be formless. Shapeless, like water. If you put water into a cup, it becomes the cup. You put water into a bottle and it becomes the bottle. You put it in a teapot it becomes the teapot. Now, water can flow or it can crash. Be water my friend." ~Bruce Lee

Harwich High has been a short four years of my life. I was faced with either leaving my brother and mom to finish high school here, or go to Maine with them and start over. Mr. Kot, youre a great man and youve done a lot for our class. Mrs. Leete, youre tough and rigorour, but youre also an amazing teacher. I never really thought the day would come, that we would be prospective seniors in high school. I always wanted it, and I always was anxious for it, but it never dawned on me that one day I would be living it. As we go through life, its milestones like these that make the journey so precious. The challenges, the tears, the stress, the petty fights and the perspectives we develop seem to inhabit our very existence in that very moment. But the goal is to learn how to remove yourself from your own perspective, and attempt to see the world for how enormous it really is, recognizing the good with the ugly.

These last 3 years I have been one to ponder these elements of life relentlessly, as you may have, and as we start to plan our lives, I have a few words of wisdom to offer. Educate yourself. Invest your intellect and your spirit into something-ANYTHING- that interests you. Thats what the journey to adulthood is all about; deciphering truth from deception, organizing your priorities, and determining your place in the world. Dont strengthen the ignorance of the world, for it is ignorance that weakens us both individually and universally. Discover your definition of passion, and embrace it. Success in all forms comes easy with passion. Passion is everything.

No matter where the future may take us, know that there is ALWAYS someone to help you when you need the extra support. But it is important that you do this responsibly, without taking advantage of those around you. There is a fine line between needing others, and using others. Never turn your back on your family, your friends, or your loved ones. They are the ones who made you who you are today, and those are the relationships that make life worth the hardships. Most importantly: Know Thyself. Find out who you are, what you stand for, and be proud of that. Do not change for anybody, but be willing to grow. Often times people are blind to manipulation in many forms, but do your best to avoid it. Dont forget who you are, and what you want. If you want something bad enough, you can make it happen. After all, we live in the land of opportunity, so its now or never! FINALLY, weve come to the final lap! Im here for yaaaaa. 2009 CREWW I LOVE YOUUUU.

This year, the sophomore class had a new set of class officers with Abigail Hynes-Houston as secretary, Janelle Veary as treasurer, Fiona O'Connor as vice president, and Meredith Mason as president. We started our first major fundraisers over the summer, and continued making money towards prom during the rest of the school year. Along with our advancement in fundraisers, we were also pleased to have the addition of Dave Demers as a class advisor, in addition to Ms. Barton.

Although sophomore year can be rough without the excitement of entering a new school like last year, we will have a lot to look forward to during our junior year. With such a variety of students with such different activities and interests, we are a very well rounded class. The diversity in the Class of 2010 allows the pooling of ideas that benefits the class as a whole. With half of our High School career completed, we have all to gain and nothing to lose.

Class of 2011 is very motivated to do great things. We are already fundraising for future events like junior prom and senior banquet because we want to do something big for our senior banquet like possibly traveling somewhere over night as a grade. Some past fundraisers that we've done so far were selling food products and Yankee candles. We made a good profit off of the candle fundraiser. As freshman we personally think that we had good school spirit during homecoming week as well.

Future plans that we have in our goals is to have bake sales, sell more items such as candles, and make a 2011 grade t-shirt for sale before the end of this school year. We would also like to set up a stand during the music in the port strolls in Harwich port during the summer selling items. We are at a good finical stand-point as of now.

John Ryan

John Ryan was a lot of different things to a lot of different people. I do not claim that my experiences with him were anything like yours, but I think that most people would have similar stories and thoughts about him. To me, John was my teacher, my mentor, and my friend.

I had John for web design my freshman year; he happily let me join the class even though it was technically only juniors and seniors at that time. I had met him a few times in previous years, when my brother had had him as a teacher. He always seemed like a really cool guy to me, and he treated us differently than the other teachers did: he respected us. For example, John wanted our class to feel what it would be like to actually work in the field. When we met, we would sit down and have a formal meeting; at finals time, he continued that tradition and had us show up at his class early, telling us that we would be doing our final as if it was a business project: "We have limited time and a pizza in the back, lets get moving!" He was not afraid to be himself around us and said things I never thought a teacher would say. He made old movie and computer jokes that almost nobody understood except for me. It was then that I realized John didn't care if no one understood most of the stuff he said. He was living proof that if you're just yourself, and live the way you want, things will work out.

That year John really re-sparked my interest in computer programming. By the end of that class I had not only learned what he was teaching, but had gone out on my own to learn more. Throughout the next three years I took every class that John offered, and when I could'nt find classes to take in VHS, he'd give me an independent study, which would quickly turn into us collaborating on various projects. We designed the layout for a new Harwich web page before the town even commissioned one, and then worked non-stop to make theirs viable. We designed a web-cast which crashed so often that we never made it public. We were so close to finishing it this year...

John always appealed to my inventive side. Freshman year he told me to design a page similar to one that a tech school had. The problem was that no one knew how to do it. That's when he taught me about borrowing code, which I eventually learned to read, whether or not I could write it myself. For my final projects in his visual basic class, merely for the fun of doing it, I made a geometry program that went above and beyond what he asked for. I also made a game to test how fast someone could click a button, and often found John playing it when he had a few minutes to kill. He and I would play hacky-sack at the beginning of class or at the end of the day; since neither of us were very

good, we spent more time retrieving the ball than actually hitting it. Most days after school, I spent at least half an hour in his room talking about projects, working on them, or just watching funny videos.

John was always incredibly protective of his lab. He only gave a select few people administrator rights, and he always made sure everything was relatively clean and functional. When his mouse pad was missing for a week, he began telling people to try to figure out who took it--he said he just wanted it back because an old student had designed it. He searched for that mouse pad for a couple months before giving up. After he passed away, as we were cleaning the personal stuff out of his desk, I found that mouse pad. He was never as organized as he liked to think.

It's the generally overlooked things which tend to surface in my mind when I think about John: for instance, he never said "under God" when saying the Pledge of Allegiance because he didn't learn it that way as a kid. For the past four years I have heard him repeat many sayings that seemed to be the maxims of his life. I find myself saying them more and more now that he is gone:

"That should be intuitively obvious to the most casual observer."

"KISS: keep it simple, stupid -- that's more complicated than it needs to be"

"RTFS: read the screen -- the F is silent."

"Coooooool."

"Duhhhh."

Those are a few of the things that now find their way into my vocabulary on a regular basis.

He had serious discussions with me and didn't keep me in the dark about the goings-on of the school. He treated me as if I had as much to teach him as he had to teach me. He respected me as a person; he didn't dismiss me as a kid. And because of that, I became more of a person, and less of a kid.

He was often one of the only reasons I showed up to school at all. He still is.
